Winthrop, Ma. 02152

Dear Tom:

Enclosed is the AHC Mission Statement that you requested. I also received a message from the Office of The Town Manager. It was regarding the submission of the Committee Report for the Annual Town Report. As you know these reports usually just list the meetings held, television programs conducted and so forth. I thought that this year I would submit a copy of the AHC Mission Statement which is far more relevant than just rehashing what we did the past year.

Our Town has a rather complex relationship with both the FAA and Massport. Most of the activities at Logan do have an effect on our Community both positive and negative. That is the reason we must continue to monitor not only the FAA and Massport but also the airline industry.

Sincerely,

Bob Driscoll
Chairman

**TOWN OF WINTHROP
NOISE, AIR POLLUTION & AIRPORT HAZARDS COMMITTEE**

MISSION STATEMENT

The Town of Winthrop and its residents have been seriously and negatively affected by the operation at Logan International Airport.

The Town has repeatedly requested action be taken toward reducing noise, air pollution and hazards arising out of the operation at Logan Airport

The operational capacity at Logan Airport has increased over the years with resulting increase in noise, air pollution and hazards to the Town and its citizens.

The Town is on record as opposing any further increase in the operational levels at Logan Airport.

The Town of Winthrop, its people and officials are on record calling on all the proper officers of the Commonwealth and Federal Government to explore all possible means to alleviate and eliminate the dangers and hazards of noise, air pollution and low overflights of aircraft in the vicinity of Logan International Airport.

The Town further established the Noise, Air Pollution & Airport Hazards Committee whose mission is to take all necessary and proper action for protection of persons and property in the Town from noise, air pollution and other hazards arising out of aircraft operations in the airspace and vicinity of the Town, including appointments of committees, employment of experts and personnel and purchase or hiring of equipment, and to associate with any agencies, public or private, for such purpose, and to travel, including out of state travel, for any purpose related to this committees activities and mission.
